

LeapTrack® Assessment & Instruction System

Grades K – 5

Providing personalized learning paths to accelerate student mastery of state standards

Meets NCLB Guidelines

Now available in version 4.0

How does the LeapTrack system accelerate student learning in mixed-ability classrooms?

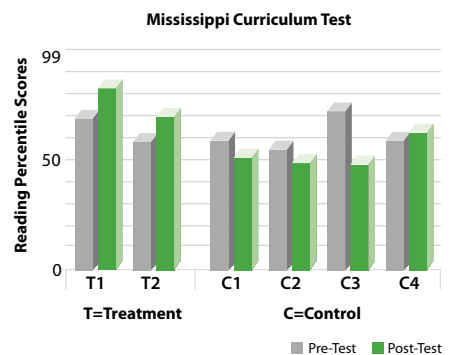

- Promotes success for all students through ongoing formative assessment and differentiated instruction aligned to state content standards in Reading, Math, and Language Arts
- Differentiates instruction with personalized learning paths based on system-generated assessment results
- Prevents learning gaps with engaging, motivating instructional content and LeapTrack alerts that signal need for early intervention
- Strengthens communication about student progress with easy-to-use reports for parents, teachers, and school and district administrators
- Provides hands-on learning experiences with standards-based, interactive content libraries and portable personal learning tools (PLTs)

Research Shows

The LeapTrack System Promotes Substantive Achievement Gains

In a seven-month, independently controlled study*, funded by the Department of Education, third-grade students using the LeapTrack system showed average gains of 16%, while control-group students showed average losses of 10%.

*Independently conducted by Delta State University

3 Steps to Success with the LeapTrack® System

With the LeapTrack system's 3-step model, teachers can quickly and continuously assess students' skills, pinpoint areas for improvement, and create individualized lesson plans for every student.

1 Assess

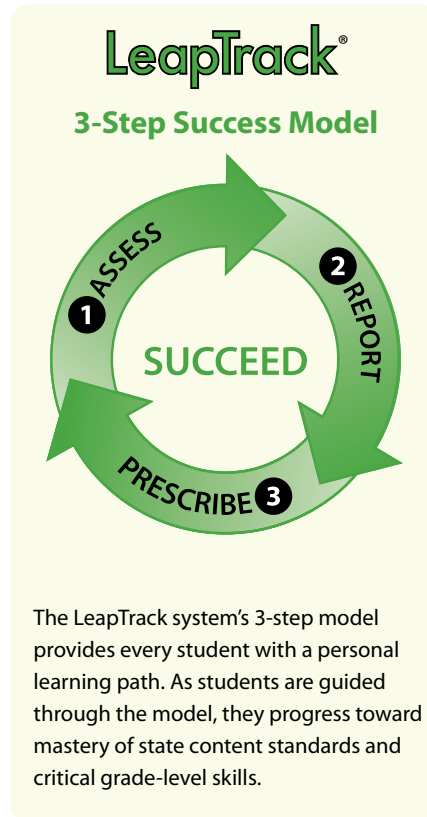

Teachers can easily and effectively assign standards-based formative assessment using the system's management software and the award-winning LeapPad® and Quantum LeapPad PLTs.

2 Report

In seconds, the LeapTrack system identifies areas of strength and improvement needed—reporting in individual and aggregate formats. The system delivers just the right amount of information for educators to quickly analyze and communicate student progress.

3 Prescribe

Unique personal learning paths are prescribed for every student based on individual assessment results. Standards-based instructional content is brought to life with the engaging portable PLTs.

Instructional Focus

Formative Assessment
Differentiated Instruction

LeapTrack® Assessment & Instruction System

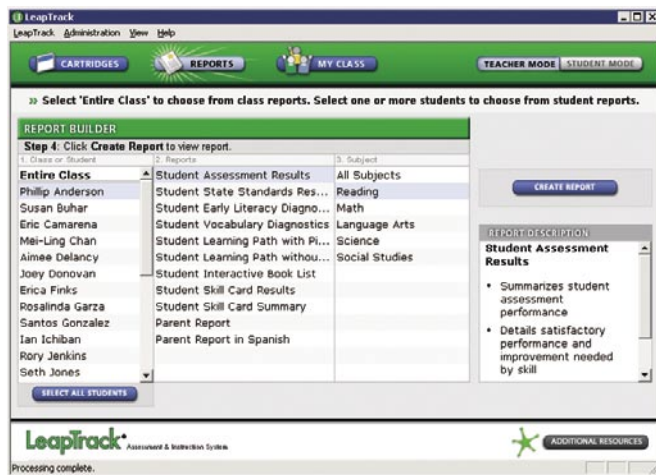

Easy Classroom Management

Now it's easier than ever to deliver formative assessment and differentiated instruction, while tracking student, class, school, and district progress. An intuitive interface supports efficient classroom management of assessment and instruction, quick review of student results, and close monitoring of student progress.

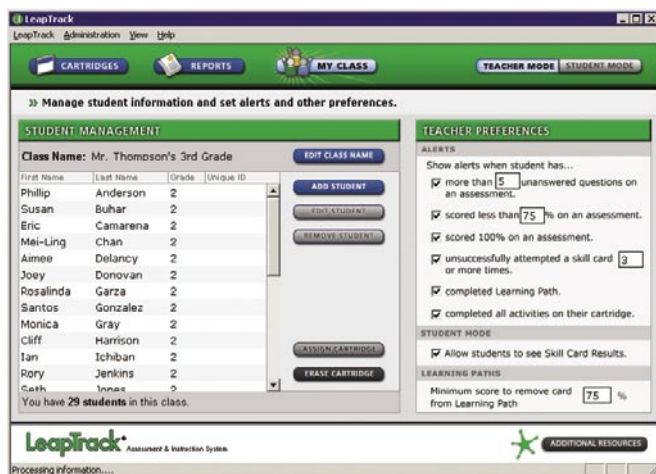

Assess Progress and Prescribe Instruction

Quickly view important student performance data, assign content, and refresh student learning paths. The LeapTrack alerts signal the need for early intervention.

Generate Instant Reports

Immediately generate reports showing progress toward state standards at the student, class, school, and district levels. More than 20 reports are available.

Manage System Tasks

Manage many of the system's important day-to-day operating tasks and keep student information up-to-date.

Instant Feedback and Personal Learning Paths

The LeapTrack system's **Report Builder** makes searching and assessing student progress more manageable and efficient than ever. Easy-to-use reports quickly outline student learning needs and areas of strength, as well as student performance against key state content standards. Reports are available at student, class, school, and district levels. Reports for parents are also provided.

Student Learning Path with Pictures Report

Personal Learning Paths

Deliver on the promise of differentiated instruction with the LeapTrack system's personal Student Learning Paths. In the Student Learning Path with Pictures report, every student receives an individual lesson plan in the form of a personalized report. And the report provides students with a visual guide to the skill cards to support independent learning with the LeapTrack system. A text-only report is also available.

GRADES K – 5

LeapTrack® Assessment & Instruction System

Meeting the needs of mixed-ability classrooms

LeapTrack Kit Components:

LeapTrack Management Software is available for Apple® Macintosh® computers or computers using Microsoft® Windows®. Please see our website for a list of important system requirements and installation options.

Standards-based content for multiple student levels in each classroom kit includes:

- **Assessment books** for Reading, Math, and Language Arts. Additional assessments for early literacy, vocabulary diagnostics, and practice tests (types of assessments included vary by grade level)
- **Skill cards** for engaging interactive instruction across the content areas

Interactive decodable books for grades K – 2 for additional decoding practice

Additional interactive libraries: more than 150 interactive books available from LeapFrog SchoolHouse (see sidebar on p. 9 for the libraries that log within the LeapTrack system)

Personal learning tools (PLTs) deliver engaging, interactive, and supportive learning experiences.

Student cartridges read and write assessment and instructional content.

The LeapPort™ cartridge station transfers data between the computer and the student cartridges.

The Classroom Handbook and the Installation Guide each support effective classroom implementation of the LeapTrack system.

The Getting Started Video contains step-by-step instructions for implementing and using your LeapTrack system.

For exact LeapTrack kit configurations, visit www.LeapTrack.com

Educators say:

“With the LeapTrack system, I’m able to quickly and easily assess every student. Then I’m given a learning path for each student that addresses his or her specific learning needs. I have a teaching resource that keeps students effectively engaged.”

Steve Hartley, Teacher and Technology Coordinator
E.R. Sheldon Elementary School, Fairfield, CA
